## CAREER OBJECTIVE

Computer Science student specializing in Data Science and Data Analysis. Good at working with data, using tools like Python, Pandas, and SQL. Experienced in data cleaning, visualization, and building useful insights through projects. Interested in solving real-world problems using data.

## EDUCATION

|                                                        |                      |
|--------------------------------------------------------|----------------------|
| <b>Malla Reddy Engineering College</b>                 | Hyderabad, Telangana |
| B.Tech in Computer Science Engineering - DS, GPA: 8.55 | 2022 – 2026          |
| <b>SR Junior College</b>                               | Hyderabad, Telangana |
| 12th Grade, Marks: 950/1000                            | 2020 - 2022          |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                           |                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Data Science Intern - Skillmate Technologies</b>                                                                                                                                                                                                                                                       | <b>April 2024 - May 2024</b> |
| <ul style="list-style-type: none"><li>Developed and optimized machine learning models for predictive analysis, improving accuracy in data-driven decision-making.</li><li>Preprocessed large datasets using Python libraries like Pandas and NumPy, enhancing model efficiency and Performance.</li></ul> |                              |

## TECHNICAL Skills

|                                                                                                               |
|---------------------------------------------------------------------------------------------------------------|
| <b>Programming Languages:</b> Python, SQL, Java (Basic)                                                       |
| <b>Libraries &amp; Frameworks:</b> Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Flask, Streamlit (Basic) |
| <b>Data Tools &amp; Technologies:</b> Jupyter Notebook, Power BI, Excel, Git, GitHub                          |
| <b>Databases:</b> MySQL, MongoDB (Basic)                                                                      |
| <b>Soft Skills:</b> Analytical Thinking, Problem Solving, Communication, Team Management                      |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Stock Market Analysis and Prediction   Python, Scikit-learn, Pandas, Flask   (<a href="#">GitHub</a>)</b>                                                                                                                                                                                                                                                                                                                 |
| <ul style="list-style-type: none"><li>Built ML models (LSTM, RNN) to predict stock prices, improving prediction accuracy.</li><li>Collected and preprocessed historical stock data using yFinance and Pandas.</li><li>Collaborated with developers under the GSSoC program to transform data workflows into a full-stack stock prediction web application.</li></ul>                                                         |
| <b>Department of Data Science Results analysis   Python, pandas, Web-Scraping   (<a href="#">GitHub</a>)</b>                                                                                                                                                                                                                                                                                                                 |
| <ul style="list-style-type: none"><li>Scraped academic performance data for 210+ students using Selenium.</li><li>Cleaned and structured data with 95% accuracy and performed exploratory data analysis.</li><li>Visualized subject-wise averages and section-wise performance using Matplotlib &amp; Seaborn.</li><li>Delivered insights that highlighted departmental trends and areas for academic improvement.</li></ul> |

## AWARDS AND ACHIEVEMENTS

- Secured 3rd Position in AI Hackathon Conducted by Atharva Data Science Community (ADSC) At Malla Reddy Engineering College (MREC)
- Achieved Elite Badge in Python for Data Science course, certified by NPTEL & IITs.
